

Whimsical Blue Christmas

All images © Stampin' Up!®

To order any of the supplies used in this tutorial contact me at sharon@inkup.us or just go to [my store and order.](#)

Supplies:

- Stamps: Whimsical Trees (#156330)
- Ink: Night of Navy (#147110), VersaMark (#102283)
- Paper: Misty Moonlight (#153081), Basic White (#159276)
- Designer Paper: Beauty of the Earth (#155841)
- Tools & Accessories: Christmas Trees Dies (#156339), Mini Dimensionals (#144108), Tombow Multipurpose Glue (#110755), Seasonal Labels Dies (#156299), Opal Rounds (#154289), Clear Embossing Powder (#155554), Heat Tool (#129053)

Measurements:

- Card Base: Misty Moonlight – 5-1/2" x 8-1/2" scored at 4-1/4"
- Cardstock #2: Various scraps of Misty Moonlight for the die cuts
- Cardstock #3: Basic White – 3" x 1-1/2" for sentiment
- Cardstock #4: Basic White – 5-1/4" x 4" for inside
- Designer Series Paper: 5-1/4" x 4"

Instructions:

- Tape/glue the piece of Designer Series Paper (DSP) to the card front.
- Stamp several of the tree images on Misty Moonlight cardstock with VersaMark and use the Clear Embossing Powder to emboss them. (NOTE: I found the VersaMark and Clear Embossing Powder looked better than just the Night of Navy ink and it gives it a little shine). Die cut several of these as well as the ones that don't have a matching stamp. Arrange them on the card front to 'suit your eye'. I popped a couple of them with dimensionals.

- Stamp a greeting of your choice with VersaMark and immediately ink with Night of Navy ink and then stamp on Basic White cardstock. Emboss with Clear Embossing Powder and die cut. Affix this with dimensionals to the card front.
- Place some Oval Rounds on the card front.
- Stamp a tree or two on the piece of Basic White and tape/glue it to the inside of your card.

For the sentiment, I used one of the dies from the Seasonal Labels. Here's how I die cut the label for the sentiment on the front of the card.

Line up the left side of the die and cut as shown in the image on the left. Then move the die and line up the right side where you want it to cut. If you jiggle the die just a bit, you can feel it 'catch' the horizontal cut and know you have it lined up correctly.
